# Discover

Look, it's simple...

## Builders Database

- **Apply free** and make your business visible
- **Search** by phrase, location, postcode and find builders in your region
- **Search** by activity
- **Make and save** notes
- **Make presentation** of your business

## Buy Materials

- **Max 3 taps** from getting material price
- **3 more taps** to order
- It's **quicker** than dialing any phone number!

## EIY - Estimate It Yourself

- **Free version:** calculate any construction job with IBB rates as proposal
- **Free registered version:**
  - register and add to above your name and logo
  - archive estimates
- **Pay as You Go** version (20.99 GBP/7 days):
  - amend your own rates and overheads
  - generate PDF file and send by email
  - discounts for purchasing materials with IBB - 30%
- **PRO** version (599.99 GBP/annum):
  - unlimited options
  - biggest discounts for materials purchase at IBB - 40%

## Weekly deals

- Every week unbelievable **discounted prices!**

## Open new tender

- use it if you need to do any building job
- set few details
- send to builders database using searching options

## Earn with us

Applying is as simple as 1,2,3

1. **Register Free**
2. **Recommend IBB** using your unique Login and build your group
3. **Take your commission** from your group purchases T&C apply

## My account

- manage your data: address, email, activities, etc.
- add logo
- reset password, find your login if lost

## Selfie with IBB

- never enough fun
- make photo with IBB and take a chance to win prize money every month

If you have any questions about our App or you want to upgrade visit [www.IBBestimator.co.uk](http://www.IBBestimator.co.uk) or call us 020 8965 7972.

Available on:

General

- all products are subject to availability;
- products may vary from those illustrated;
- prices are subject to change without notice;
- all prices are net exclusive of VAT;
- some Prices shown are for collections only;
- some Prices are with additional delivery cost per piece but still value of delivery has to be minimum £180.00 net.

Payments

- debit/credit cards
- bank transfers
- cash
- cash on delivery.

Delivery

- same day and next day delivery within Greater London (M25)
- goods ordered after 12 pm will be delivered next working day
- free delivery for purchases over £180 net - within M25 (London) and B42 (Birmingham)
- for purchase under £180 net - lump sum £30.
- If a product is marked with additional delivery cost e.g.. 1 0.50 it's still subject to other Terms & Conditions eg minimum spent £180 net for free delivery within M25 (London branch) or B42 (Birmingham)

Discount price levels

£ Retail price. £19.58 £17.62 £15.66 £13.70 £11.74

# How to make money with IBBestimator App?

“You can't be that much overworked do not have time to make money”.

We can offer you an excellent chance to make money with us. The foundation of this is IBBestimator application.

**There is no magic. Here is how it works.**

We have decided that 6% of our profit instead of being spend for the commercial adverts etc. will be spend on companies and these people who promote us. “Earn with us” IBBestimator program is a typical networking partner’s program, where when you recommend us to a further customer – we pay you an excellent money from their purchases as a commission.

**To register to the “Earn with us” program you need to be simply an IBBestimator registered user!**

Once you have accepted the Terms&Conditions you will be allowed to recommend us to 10 persons or companies who will build next 100 group of people or companies and then next 1000 group of people or companies and make profit from their purchases (see rows of Table below).

**In your concern is that:**

- found by you people or companies are also registered as IBBestimator users
- they present your unique login while they register themselves and others to allow system to recognise your group.

From that very moment all purchases done by these persons or companies will be incorporated in to your account and will give you a permission to get commission.

This should be easy for you to achieve because over 5000 products we sell at the lowest prices in UK market and we take special care for prices for IBBestimator users.

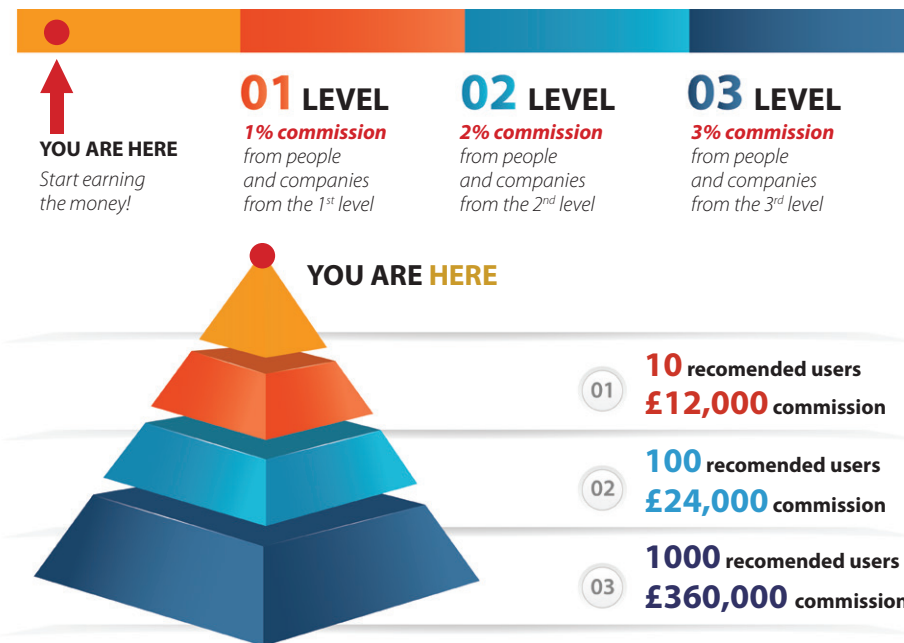

Possibility of brilliant earnings rises because the program allows the commission to be collected from three levels of people or companies according to numerous-level marketing. The group, from which purchases you can earn the income is 1110 maximum (people and companies), i.e. 10 on the first level, 100 on the second level and finally 1000 on the third level (see pyramid). **Do not afraid this (as other financial pyramids) – in our program we are only one who pay!**

**To calculate the commission amount the following rules apply:**

- 1% - from people and companies from the 1st level
- 2% - from people and companies from the 2nd level
- 3% - from people and companies from the 3rd level

The table below shows you the possibility to earn superb money assuming that whole group (full 3 levels) has been build up. In conclusion, the first condition needs your full commitment as you will need to find the 3 levels of buyers, the second condition is that every each registered on-line IBB or IBBestimator App user will do the shopping for minimum £1000 per month. Purchase for £1000 per month can be the average order even for small builders.

It goes without saying, that building the group with less number of people and companies but who buy more and buy higher value products gives you an excellent income worth commitment.

Created by us on-line accounting system and evidence of every each transaction on the server make that summary of each client’s purchases (who will give us his login while purchasing) are linked to precise people/companies in specified groups.

The on-line mechanisms allow every one IBBestimator App user in real time 24/7 to monitor his own profit, profits of whole his group and the amount of his commission due.

**This program could be in addition an amusing game!**

Can we afford to miss the chance to make an extra money in the difficult time these days? We can't explain everything in this short article. Everyone who is interested in this program can feel most invited to an information meeting and IBBestimator training we organise regularly in IBB Park Royal branch. We have limited visitors space each training.

Diagrams - showing potential commission of IBBestimator App user

Earning levels	Max quantity of commitment people/companies	Sample of yearly purchase value (£)*	Commission (£)
1% – commission from yearly purchases from people/companies from the 1st level	10	120,000	1,200
2% – commission from yearly purchases from people/companies from the 2nd level	100	1,200,000	24,000
3% – commission from yearly purchases from people/companies from the 3rd level	1000	12,000,000	360,000
<b>Your TOTAL annually earnings can reach ...</b>			<b>£385,200*</b>

\* Quotation is based assuming that each buyer will purchase for 1,000 net per month. Even build up group and commission will be smaller – still the money are earned “when you sleep”.

**To book your IBBestimator training:**

## IBB Estimator - Java-based on-line calculator for the estimation of construction works

- Estimating Labor, Materials, Plant&Tools and Overheads Equipment
- Allows editing and changes to above factors
- Filtering estimates using the convenient On-Hide-Off options
- Automatically generates workload and work schedule with possibility to edit it
- Changing purchasing price levels of materials depending on the level of discounts granted
- Allows purchasing directly from the Estimator or subdivision application IBB Shopping on-line with the highest possible level of discounts - PRO version only
- Preview descriptions of products and drawings
- Automatic import of user's custom logo and corporate data applications
- Description of the building object, construction work covered by the calculation including: customer name, No ref, date, etc.
- Exporting data to PDF and Excel formats and printing estimates - PRO version only
- Archiving your estimates - allows access to saved estimates and editing them in the future (PRO version?)

If you are interested in subscription of Licence to use the IBB Estimator please contact us by calling **020 8965 7972** or email: **sales@ibb.pl**

**Dry lining is alternative method to plastering, but:**

- less costs and more effective than traditional plastering
- metal dry wall is more effective than based on timber battens, specially suspended ceilings
- dry lining allow easily create curves walls and arch ceilings
- there is no necessary to plaster the whole wall only joints between plasterboard sheets
- there is not so messy job like plastering

Please see below typical estimation for dry lining ceiling and partition wall:

**Rates per 1 sqm suspended ceiling includes:**

- fitting ceiling truck UD-28/4m around walls
- fitting ceiling main channel CD-60/4m
- CD60 connector – for joining CD-60 where necessary
- CD cross connectors – not included - necessary with double layer of plasterboards
- ES-60/75mm – brackets for CD main channels, if ceiling will be suspend more than 12cm it will be necessary different eg WSO brackets and PM wire
- alternatively use adjusting brackets WSO with wire PM 12,5cm,25cm,50cm, 75cm, 100cm or 150cm the strongest suspended system dedicated for suspending up to 3m or more is based on nonius hangers (also available in IBB)

# Estimates & Consultations

*It may be that you already have your plans and are ready to prepare a bid and do the work but you have not enough time? **We can help!** Just bring us your plans and relax. We will help you to calculate the best price, choose materials and find the best solutions.*

**We kindly invite you to use our service under the following conditions:**

IBBestimator estimating tool uses labour workload as a basis of calculations e.g. how many hours it takes to do a specific work - always average factors are taken for consideration; for example carrying materials does not include 10 storey buildings etc.

Estimated value of works is a consequence of above - volume of workload and labour rates, in addition the last value is dependent on overheads and profit.

**We do not prepare tender documents.**

The tender price depends on variety of factors beyond our influence as for example:

- assessment of wealth and customer's requirements
- location evaluation
- analysis of the customer's possible profit
- the relations with the architect
- the level of expected profit
- the risk of overstatement of the tender price
- provisional amounts for both the contractor and subcontractors, etc.

We are not taking for consideration:

- customer's wealth level
- property's area wealth where the works are to be conducted
- competitors calculations
- relationship with client or architect
- the level of difficulties arising from the location inconvenience during the works, etc.
- profit level
- risk ratio
- provisional values

We estimate the risk of far too low prices and too low workload, materials or equipment and the ability to perform the work strictly with the budget; the profit level is up to the contractor. We assess the risk of underestimated prices. We try to assess the complementarity of documentation and take under consideration the minimum work necessary to complete the project even if it's not included in the documentation despite specification documents we're not meticulous in our estimates in case of workload, workload is skipped or included in basic works essentially, with small exceptions, we estimate basic materials as a rule.

The conclusion is that the level of luxury, risk or profit level are a matter of discussion and not a matter of the valuation itself.

Final price of the enterprise is always discussed with contractor.

*If you wish to do estimations by yourself we'll be more than happy if you use our software. We provide free training followed by booking.*

# AVAL Insulated external render system

Estimate was based on polish labour and materials norms KNR nr 0-23 0931-01 and our experience. As a sample we estimated the cheapest version of elevation done with mineral render, dotted finish 1.5mm thick. We can also suggest using smooth external render based on white cement. It will give a very nice white finish. It's also possible to renovate old render with this method.

### Estimation conditions:

- materials are delivered on site
- internal transport horizontal and vertical is included in the average building situation
- labour includes fitting light scaffolding up to 4m high
- calculation of materials includes an allowance for waste
- water, electricity, sand paper and other small materials are added with 1,5% rate calculated from basic materials

### Sequece of operation:

- clean and prime the surface
- fix base edge strip according to thickness of polystyrene panels
- mix the adhesive
- cut and fix polystyrene panels to the wall
- drill holes and fix plastic plugs
- prepare polystyrene joints with special tool to make an even surface
- glue one layer of glass fibre mesh
- fix aluminium strip with glass fibre mesh to external corners
- apply adhesive base coat
- prepare render from dry powder or ready mixed ones: acrylic, silicone etc.
- apply render with steel trowel
- work wet render with plastic trowel to receive decorative finish
- cover with dust sheet to protect against rain and sun

### Average coverage of materials for making 1m2 decorative mineral render with insulation system based on 50mm thick polystyrene panels.

### Expenditure of labour for making 1sqm elevation like above

No	Discription	Labour per sqm	Rate excl.VAT [GBP]	Rate [GBP] per 1sqm excl.VAT	Rate [GBP] per 1sqm incl.VAT
1	Priming bottom surface and surface of adhesive	0.066 labour/m <sup>2</sup> *	£ 14,-	£ 0.924	£ 1.11
2	Fixing starting edge metal strip	0.237 l/m	£ 14,-	-	-
3	Fixing polystyrene panels	1.329 l/m <sup>2</sup> *	£ 14,-	£ 18.61	£ 22.33
4	Fixing corners with mesh	0.220 l/m	£ 14,-	-	-
5	Coating mesh with adhesive	0.611 l/m <sup>2</sup> *	£ 14,-	£ 8.55	£ 10.26
6	Rendering	0.493 l/m <sup>2</sup> *	£ 14,-	£ 6.90	£ 8.28
<b>Total</b>		<b>2.606 l/m<sup>2</sup>*</b>		<b>£ 34.98</b>	<b>£ 41.97</b>

**Attention:** in our quotation we have only described positions marked with\*, all the rest you have to calculate individually like corner with mesh according to how many reveals there are on the elevation, it is also important that for reveals you have to increase the quotation, same for scaffolding or colour or for more than one colour.

■ Adhesive ■ Polystyrene panel ■ Mesh ■ Primer ■ Render ■ Plug

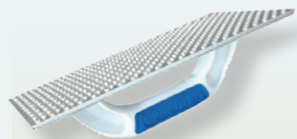

**Important information regarding building elevation:**

- while choosing metal edge strip please mind that both thickness of polystyrene panels and thickness of adhesive are important,
- apply adhesive around the edge of polystyrene panel and in the middle,
- fix plugs only in the area where adhesive is applied
- attention: it is not necessary to fix polystyrene panels with plugs when the elevation is a small area. Adhesive only will do the job,
- on British market you should cover the fixing screws with polystyrene plugs to protect against cold bridge,
- when preparing insulation surface, adhesive layer, etc should be done carefully and evenly; the adhesive surface should not be sanded – otherwise it is difficult to apply the render and get a good finish,
- thickness of one coat is only the thickness of the grain used in the render – you can not level the surface by just applying another layer of render,
- the surface area of one level elevation should be done continuously from one side to the another without a break, by two people – one for applying the render and second one for making the decorative finish. If you allow part of a surface to dry before continuing it will leave a ripples on the surface

- do not apply render during rain or bright sunshine
- if some render drops from the elevation during application – do not re-use it
- you can check the skills and experience of your builders by looking under the scaffolding for fallen render.
- - you can use a pre- coloured render but remember - if you use an acrylic external paint always wait 28 days – you can paint after 24 hours but you must use a silicat external paint
- If you use a coloured render make sure it is an acrylic one.
- for insulating polystyrene panels you can use 2-3 cm thickness but there is nomatching edge metal strip to be found.
- You can apply thin layer render on to old cement based render – but cleaning, priming and applying fiberglass mesh with adhesive is a must.
- in some situations it is necessary to fit insulated rendering system with special buttons
- new render finishes should be protected against weather, especially rain, by using plastic sheeting– repairing damaged render can only be done by applying a new layer of adhesive with mesh and new decorative render

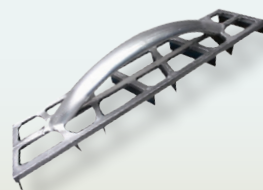

**Useful tools**

**Trowel with sandplate**  
**£4.58\***

**Plastic trowel for decorative render**  
**£3.40\***

**Scraper for old renders**  
**£13.75\***

**Attention!**

Our norms and rates should be taken as a guide only and there are no obligations for anybody to follow them; you have to take sole responsibility and apply your own rates to your quotations. Cost of materials may vary from prices shown on the manufacturers specification. We can not accept any responsibility for anyone using this information – you must make your own calculations.

Technical Distributor of ATLAS/AVAL products in United Kingdom

If you want to provide your customer with 25 years Manufacturer warranty - apply to become an **Authorised AVAL ETICS\* installer** (25 years Manufacturer warranty)

**Authorisation of installers.**

Applying for the title of authorized/approved installer – any installer applying for right to execute works with ATLAS/AVAL systems within the programs covered by the manufacturer's warranty should provide in cooperation with the Technical Distributor:

1. Port folio listing jobs done with products/systems Atlas. Port folio should provide addresses, number of years of experience with external thermal insulation, photographic evidence;
2. Number of installation teams working within one installing entity – each team should be led by and ETICS Supervisor with min. 3 – year experience in working with ATLAS/AVAL ETICS; list also the number of workmen within a team and their experience in installation of ATLAS/AVAL external thermal insulation systems or systems technologically similar;
3. List of persons designated for ETICS Supervisors with confirmation of their min. 3 – year experience;
4. After the port folio acceptance (as the warrantor Atlas reserves right to reject an application) each candidate for the title of an authorized installer is supposed to be trained at Technical Distributor facilities – initial training on products and technology is conducted by a Property experienced TD's employee. Then a final training as well as theoretical and practical training led by Atlas representative is done. This training can be conducted at TD facilities or Atlas facilities in Zgierz, Poland. Each installer's employee is obeyed to participate in the training what is to be confirmed in writing with a proper certificate. Trainings led by Atlas representatives are to be conducted once/quarter a year.

5. The exam results give Atlas the right to accept an installer as an authorized contractor in the UK with possibility to work with projects requiring the manufacturer's warranty. In case of negative exam result in case of 40% or more of potential installer's employees, the contractor does not get authorization, but keeps the opportunity to pass the exam with the next group.
6. Individuals with negative exam result are not allowed to work with projects covered with the manufacturer's warranty with exclusion of apprenticeship supervised by an ETICS Supervisor. The installer is obliged to inform Atlas about such cases in writing. Also, when not all pass the exam, the number and team squads should be corrected, so only authorized employees work on site. The negative test result does not limit the possibility to go with the exam in the next term and serve apprenticeship with limitations as listed above.
7. The positive exam result constitutes a base for acceptance of applications within PAS 2030.
8. The authorized installer is obliged to get supplied with materials at Technical Distributor only, and if it's not possible, inform Atlas representative in writing and await written recommendation.
9. The authorized installer is obliged to hold up – to – date training certificates on Occupational Health and Safety issued by authorized bodies – the Technical Distributor is obliged to monitor these matters.
10. ETICS Supervisors are responsible for current monitoring of installation jobs and preparation of project documentation (including photographic evidence) as well as its passing to the Technical Distributor (or placing at agreed virtual disc folder).

\* - ETICS External Thermal Insulation Composite System

**AVAL KT 55**
**Adhesive**

Adhesive with increased elasticity and adhesion for fixing foamed polystyrene boards and making reinforced layer in thermal insulation systems.  
**Consumption:** 4-5 kg/m<sup>2</sup> (foamed polystyrene boards fixing); 3-3.5 kg/m<sup>2</sup> (reinforced layer preparation).

**Choice of door colours:**

**Door opening:**

width 765 - 1035mm; height 1970 - 2080mm

**Standard price includes** door set with frame and hardwood threshold, equipped with 2 locks. Main lock ZW1000 comes with security europrofile cylinder Gerda Pro System, key operable both side. Top lock ZW500 comes with standard europrofile cylinder with knob inside. The handleset Gerda TD1000 and top lock escutcheon. 3 hinges.

**Standard price does not include** letterbox, security hood, door knocker, numerals, viewer, door limiter, weather threshold or rain deflector which are available as option

**MAIN FEATURES**

- EXTERIOR / INTERIOR ENTRANCE DOOR
- Anti-burglary resistance ENV 1627 grade 2<sup>(1)</sup>
- Composite multi-material door (wood internal frame, rigid extruded polystyrene foam core, galvanised steel, external UV resistant veneer)
- Door facing - steel covered with decorative (wood grain or plain colour) veneer.
- Decorative, pressed moulding.
- Thermal insulation 1,4 W/Km<sup>2</sup> <sup>(1)</sup>
- Acoustic insulation 30dB <sup>(1)</sup>

**DESCRIPTION**

The family of Gerda EcoSec doors has been made for external use as entrance door for terrace houses, semi-detached or detached houses. It can also be used as doors for flats, apartments and other premises. We use materials and components which are fully weather resistant and maintenance free thus the EcoSec doors will look good and work well long years.

**SECURITY:**

- Door core made of 2 steel sheets 0.8 mm thick;
- Main, multipoint lock Gerda ZW1000 certified in grade 7 according to EN 12209 standard secures your doors against unauthorized entry;
- Additional lock Gerda ZW500 equipped with euro profile cylinder with a knob inside allows fast locking of the door.
- Three robust steel hinges with bolts engaging steel frame are very secure, protect the door against being prised out and ensure the door will not displace during operation.

- Robust frame made of 1,5mm thick steel is very important for security – protects the door against being removed from the frame, does not allow access to the locking bolts and latch (which is easy when only wood frame is applied), allows tight hinge fixing.

**WEATHER RESISTANCE:**

Gerda EcoSec doors performs very well as an exterior door. It is equipped with two sets of seal – one in the door leaf (brush seal) and the other in the frame (elastomeric – TPE). Both secure the door set against rain and wind. Optionally the door can be supplied with rain deflector. All components and material used are ready to resist influence of the weather factors.

**EASE OF USE:**

Gerda EcoSec door will work good long years with just a little maintenance:

External facing of the door – PVC foil is scratch resistant (much better than paints) and easy to be kept clean – you can wash the door with the soft cloth and soap.

Mobility threshold made of stainless steel is PART M compliant. Set of two locks allows you to protect the door fast during the day (knob operated additional lock) and secure it strongly with main lock ZX1000 for the night.

**ENVIRONMENT FRIENDLY PRODUCT.**

EcoSec doors with its u-value 1,4 W/m2K will save a lot of heat and will reduce your house carbon footprint. All components are environment friendly. Extruded polystyrene foam are CFC free. Steel used for frames and door facings is recyclable. Hardware is made of aluminium steel, brass and recyclable plastics. We use wood of FSC certified sources only.

(1) Approximated value based on the similar construction of Gerda TT door (see [www.gerda.pl](http://www.gerda.pl) to compare). The EcoSec doors – specially designed for UK market are in the process of PAS23 and PAS24 certification as well as thermal and acoustic insulation tests.
